Cool,

"One key objective at Hyphen is to delight our customers through flawless applications, and Zysk's QA team has helped us achieve that over the last three years. Their team is smart and comes up to speed fast, flexible to our changing needs and priorities, and process- and detailed-oriented which I think is the #1 quality to find bugs. We are thankful for showing us the way when it comes to quality assurance."

Meesho.io - Our new talent destination

As we progress on our mission to 'Democratize Internet Commerce for Everyone', the biggest force multiplier that enables us on this path is our Talent. Today, we are launching our new Talent Website that has been designed to help the best talent in the world discover Meesho, understand our culture and value proposition, and the cutting-edge product and tech work that our teams are doing. Our team has explored a new ground-breaking 3D-inspired visual design in this website that is reflective of the dynamism in the new age talent that we seek to hire at Meesho.

Please do give this a try (only desktop version as of now!), and as always, we are looking to hire the best talent, and interested folks can apply through this new talent website.
